MDS Ref.: 00-000-000

SUBJECT: K. G. Chase & Son Ltd - Letter of Reference

To whomsoever it may concern:

MDS has recently had the pleasure of contracting the services of KG Chase & Son LTD on a mechanical assembly project in Moncton NB. Within the mechanical assembly were three separate hydraulically actuated subsystems, and KG Chase's scope consisted of the supply and installation of the hydraulic tubing and hoses and related fittings, flushing, and pressure testing.

It was our sincere pleasure to work with Laurie Barrieau and his team. Their work was carried out in an efficient, conscientious manner and the quality of the workmanship was second to none. Before they began with the installation, Laurie and his team came to assess the work and lend their expertise to improve and simplify the design concept. The work itself was carried out quickly, and we as the customer were always kept abreast of the status, especially whenever work or parts were required that were beyond the original scope of supply. As we had no hydraulics engineer on site, Chase provided support and expertise wherever possible as well as loaning equipment that was necessary to complete the job. It is without hesitation that we recommend K.G. Chase for work of a similar nature, and look forward to the opportunity to work with them again.

This information is being submitted without any risk or responsibility on our part. If there are any specific questions regarding the above please feel free to contact the undersigned.

Kindest regards,
MDS

George Hajecek, P.Eng., MSc., M.E.Des.
